

MOBILE COVERAGE GUIDE

Summary

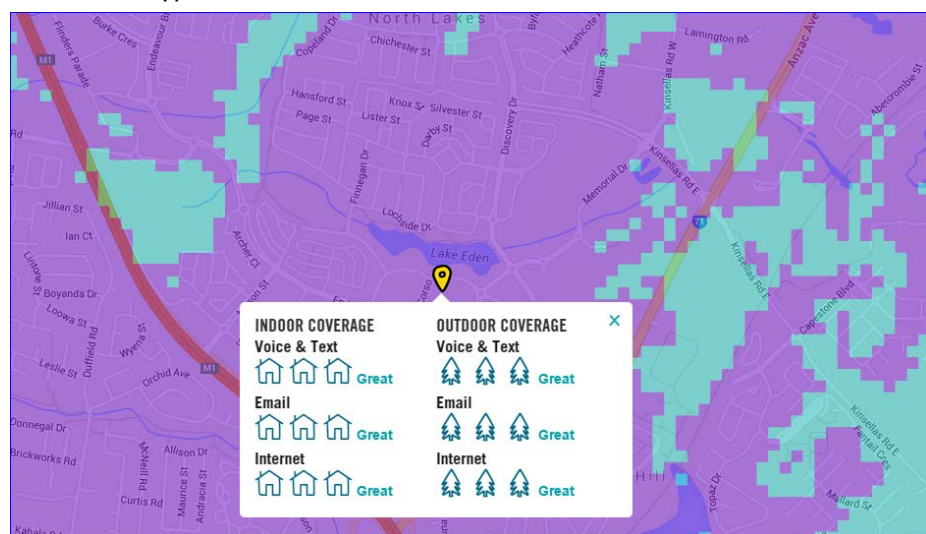

Express Telecommunications used the Optus 3G and 4G network for providing voice and data services. You can use the following link for a guide to coverage at a specific location. The device you use will have an impact on your ability to access the network and the quality and strength of your connection to the mobile network. You will be asked to select the type of equipment.

This is a guide to the expected strength of connections at a specific location. It will break it down into Indoor Coverage – (use inside your home or business premises) and Outdoor coverage (Use on the road with no obstructions). Indoor and Outdoor coverage can vary subject to the amount of obstruction and interference encountered at a specific location.

The map also provides a breakdown as to types to service used.

1. **Voice and Text,**
2. **Email and**
3. **Internet use.**

For coverage information refer to the Optus coverage map <http://www.optus.com.au/network/mobile/coverage>
